Project Synopsis/Project Concept Document
(Due: 25th January)

Remove the descriptive paragraphs in each section including this line (given in blue) stating what to do before you add this to your repository or turn it in.

Project Title	*The title of the project*
TA Mentor	*Name of the TA Mentor*
Document	DASS Project Concept Document
Creation date	*When was it created*
Version History	*Mention the version number (and specific changes pertinent to this version)*
Created By	*Who was mainly responsible for creation of this document. Also include the names of all those who worked on this document*
Client	*Name of the Client Mentor and the organization/research center*

Description
Replace this text and the instructions below with your statement in black.
Write 2-3 paragraphs describing the problem being addressed at a conceptual level. Note that even if you are simply restating what is already in the description provided by the client, you must rephrase it in your words. This gives an opportunity for the client to identify and provide feedback on differences in interpretation, if any.

Profile of Users
Replace this text and the instructions below with your statement in black.
User profile should provide details about the various types of users that are going to be using the system. Please describe the user and how they will potentially use the system. This will influence the way a specific project is designed/implemented. For example, Students, Teachers, Administrators, Parents, etc. may use a university registration system. In each case you should list down the characteristics. For example, a parent might not be computer literate which might impact the way the parent interface for the university registration system is designed.
