

Project Proposal Format

Project Title:

Team ID:

Introduction:

- a. Explain the problem the project aims to solve or the opportunity it seeks to capitalize on.
- b. Describe the project's objectives and deliverables.

Hardware Requirements:

- a. List the required hardware components such as sensors, actuators, controllers, and other devices.
- b. Specify the quantities and series of each component that is required.
- c. Explain why each component is needed and how it will contribute to the project's goals.
- d. Mention the details of the hardware features that you intend to implement.

Data collection plan:

- a. Explain how you are planning to collect the data
- b. What are the possible outcomes you would like to infer from them?

Conclusion:

- a. Summarize the key points of the proposal and reiterate the project's objectives.

Important:

- a. Read the project description before writing the proposal.
- b. Write the components requirements considering the feasibility of implementing them on a table top model.
